

## FINNSCANIA RESPECTFUL - NO CATALOGUE

We humans, have damaged mother earth enough. The paper industry and other profit-vulture cutting your "green lung". The trees are your oxygen producer. Therefore we have stop (in year 2000) as the first log home manufacture to send catalogue out. Please understand : tons of paper for waste, we have sending in one year to dealers, customers and others, round about 5500 catalogue + faxes, letters.....thats to much. We don't like the internet, but for demonstation or email traffic is a good use to save the nature. Why you not use the log home information in net or direct by a dealer. Think about your child/s or other generation comming after you.....take care of mother earth. Thanks for reading & interest.
